

ABSTRACT OF THE DISCLOSURE

A printing apparatus using a network which is
used in a network environment in which a plurality of
computer devices and a plurality of network printing
5 apparatuses are connected to a network spools printing
jobs received from the computer devices, displays
information of the printing jobs and information of
the other network printing apparatuses for a user, and
transfers the specified printing job to the specified
10 network printing apparatus when the user specifies the
printing job and the network printing apparatus.
